

DMD 2/29/08 Minutes

Presentation:

Erica Gage overviewed the Secretary of State's Web Mapping Software for election reporting.

Old Business:

ITAB Report

- Personnel Subcommittee is working to make the CIT Trainee and CIT I positions "non-competitive". This will allow us to hire at those levels in essence without regard to their ranking on the merit register. There is apparently precedence with some other job titles/positions.
- Dan will be funding a Personal Analyst position to work within the Division of Personnel on IT classifications

Web Standards Subcommittee:

- DMD Website reviews will be sent "privately" to the respective agencies for their corrective action.
- Online Security Policy approved by DMD and ITAB Security Domain. Agencies are encouraged to incorporate it into their websites.

New Business:

- MORENet's Kinetic E-Mail and Web Hosting Service contract is available in SAM II for server migration with costs in excess of \$3,000.
- Power-Up Conference 2008. Details at <http://at.mo.gov/powerup/index.shtm>. The agenda includes sessions pertinent to state web developers including a presentation by Conservation.
